

VIRASOL™

Anti-Viral Extract

Product Information Sheet

Virasol™ “Anti-Viral Extract” contains Phytotherapeutic Extracts of **Elderberry** (*Sambucus nigra*) and **Pau D’Arco** (*Tabebuia impetiginosa*). **Virasol “Anti-Viral Extract” Formula** is an antiviral extract formulation containing two of the most effective anti-viral herbs with proven effects against influenza and herpes simplex.

Elderberry (*Sambucus nigra*) is known to prevent or shorten the duration of herpes outbreaks, decrease pain and inflammation, and reduce symptoms of upper respiratory infections. Many people consider the elderberry plant one of the most powerful for preventing and treating colds and influenza by its antiviral properties. A more recent laboratory study of three different Elderberry formulations, tested on blood from 12 healthy donors, showed that they increased the production of inflammatory cytokines, which are immune system mediators. This finding indicates that Elderberry might help activate a healthy immune system and possibly be useful for boosting immunity in cancer and AIDS patients.

According to a “Randomized study of the efficacy and safety of oral elderberry extract in the treatment of influenza A and B virus infections” by [Zakay-Rones Z¹, Thom E, Wollan T, Wadstein J. J Int Med Res. 2004 Mar-Apr;32\(2\):132-40.](#) “Elderberry has been used to treat influenza, colds, and sinusitis, and has been reported to have antiviral activity against influenza and herpes simplex.

Pau D’Arco. (*Tabebuia impetiginosa*) is a tree native to the rainforests of Central and South America. In herbal medicine, extracts of the bark have long been used to treat a wide range of medical disorders. Now widely available in dietary supplement form, Pau d'arco extract contains a potent antioxidant known as quercetin thought to influence health. Pau d'arco is also rich in naphthoquinones, plant-based compounds that exert antibacterial, antiviral, and antifungal effects. Pau d'arco is used to treat a wide range of medical disorders, including anemia, asthma, bronchitis, diabetes, eczema, enlarged prostate, influenza, intestinal worms, sexually transmitted infections, skin infections, urinary tract infections, and even cancer. Pau d'arco may also help to fight inflammation, according to a 2008 study in the *Journal of Ethnopharmacology*.

- **Highly bio-available due to heat and alcohol reflux extraction**
- Extracted in **Maui, Hawaii**.
- **Organic**, Non-GMO, Gluten free
- Extracted with **Maui-grown organic sugarcane alcohol** and deep ocean mineral water.
- Rich in active ingredients.
